Biography

During my career, I have been focusing on the **multi-perspective study of Constrained Optimisation**, making **strong contributions to the state-of-the-art** both on **theoretical** and **practical** aspects and by tackling different **real-world domains**, such as collective energy purchasing, sustainable mobility, cooperative learning, high-performance computing, and AI-human value alignment. My work has been published in **36** articles, both in leading journals (**75%** of my journal articles are **Q1**) and top-level conferences (**80%** of my conference papers are **CORE A/A***). I received my PhD (Doctor Europæus) in April 2016 at the University of Verona with a thesis entitled "Constraint Optimisation Techniques for Real-World Applications", which was given the "Young Doctors Award" (Special Mention) by the Italian Association for AI (AIxIA). In 2017, I was awarded a **Marie Skłodowska-Curie Individual Fellowship** (the most prestigious post-doctoral fellowship at the European level), which I spent at the IIIA Institute of the Spanish National Research Council (CSIC). I led (as the **Scientific Principal Investigator**) the AVI-IA project (privately funded by the ITBID S.L. company), which aimed to implement an AI system that guides strategic decisions in purchasing processes by exploiting novel Constrained Optimisation techniques that I developed. The resulting AI algorithms have been fully integrated into ITBID's commercial product with a Technology Readiness Level of 7 (https://bit.ly/avi-ia). I am currently a **CSIC Tenured Researcher** (*Cientifico Titular*) and I am currently leading, as the **Co-Principal Investigator** in collaboration with the CSIC's Unity of Institutional Intelligence (UNIN), a MOMENTUM project aimed at devising AI solutions for the CSIC's *Institutional Strategy*, i.e., to improve the efficiency of the data management and processes of the CSIC's administration through AI.
