## Short Bio

---

During my research career I have been focusing on the **multi-perspective study of Constraint Optimisation**, by **making strong contributions to the state-of-the-art** both on **theoretical** and **practical** aspects and by tackling **different real-world problem domains** (e.g., collective energy purchasing, ridesharing, team formation, high-performance computing). I received my Ph.D. (Doctor Europæus) in April 2016 at the University of Verona. The research work of my Ph.D. thesis has been published in **10** articles in some of the most prestigious venues of the AI community, both leading international peer-reviewed journals and top-level international conferences. As a result, in 2017 I was awarded with a **Marie Skłodowska-Curie Individual Fellowship**, the most competitive and prestigious post-doctoral fellowships at European level, which I spent at the IIA institute of the Spanish National Research Council (CSIC). As a Marie-Curie Fellow, I continued working on prominent real-world Collective Intelligence applications such as ridesharing and team formation, publishing **5** articles both in leading international journals and top-level international conferences. I am currently a Postdoctoral Research Fellow at the IIA-CSIC, in charge of designing and implementing optimisation solution techniques for collaborative transportation and logistics (co-loading) as part of the LOGISTAR project.
